

FACULTY INFORMATION

Faculty of Allied and Health Sciences

Promote a Stronger, Healthier World

Are you interested in promoting the health and well-being of individuals, communities, and entire populations? We offer a number of health degrees to help you achieve your goals, whether you are looking to launch or advance your career in this critically important field.

Allied and health sciences degree from Ballsbridge University can prepare you to pursue opportunities in a diverse array of settings, including healthcare services, disease prevention and health promotion, research, and education. Graduates of our allied and health sciences programs are accomplished health specialists, advisors, advocates, teachers, and administrators who are making a difference in their lives—and in the lives of others.

An Opportunity to Make an Impact

Our curriculum focuses on the core professional knowledge you need to succeed in your career and how to use that knowledge to make a meaningful difference in society. At the beginning of your program, you will be asked to articulate your career goals. During your program, you will be encouraged to evolve as a social change agent by applying what you learn to make a significant impact in your field and your community.

Programs

Allied Sciences: *BSc. Nursing, BSc. Midwifery, BSc. Laboratory Technician, BSc. Pharmacy Assistant, and BSc. Physician Assistant.*

Health Sciences: *BSc. Public Health, BSc. Healthcare Management*

Department of Public Health

Overview

From disease prevention to disaster relief and child wellness programs, public health professionals facilitate the conditions for healthy, productive, and safe society. Change your world and the world of those around you and create a positive impact on local, national, or international communities with Ballsbridge public health degree program.

Our BS in Public Health program prepares learners to apply public health skills and competencies across a number of public health-related settings in order to improve the health of populations. Rooted in the principles and competencies of public health, the curriculum prepares students to translate and apply course content into practice. In this public health degree program, students learn about a range of issues impacting population health and healthcare systems, including environmental health, disease prevention, health informatics, family and reproductive health, global health, ethics, and behavioral and cultural issues.

Career Options

Whether you are interested in raising public awareness of health issues, managing healthcare organizations, or contributing to the policymaking process, the public health field offers a wide range of career options. Career options include:

- Health promotion officer
- Health services manager
- Disease prevention and control officer
- Public health information officer
- Family and reproductive health officer
- Program director
- Public health emergency preparedness and response coordinator
- Research associate
- Safety and health specialist

Why Public Health?

Public health policy impacts our daily lives. Whether it is through assurances that our drinking water is clean or monitoring the spread of pandemics, public health professionals protect and promote the health of populations. There is an increasing shortage of formally trained public health professionals and students in training to meet the immediate and future demand, leaving communities vulnerable. The demand for qualified public health professionals has never been greater than now. Ballsbridge's BS in Public Health can help you develop the competencies to enter or advance in the public health field.

A Growing Field

Recent legislation and national initiatives designed to improve public health have raised awareness of the importance of healthy lifestyles and disease prevention measures. Across the

private, public, and nonprofit sectors, new opportunities are emerging to engage communities in public health programs and services. The range of career options continues to expand for those entering or seeking to advance in the field. Public health practitioners can truly make a difference as agents of social change in the lives of communities and individuals in areas ranging from health education to applied research.

Curriculum

Department of Nursing and Midwifery

Take the Next Step in Your Healthcare Career

Are you looking to advance as a nursing professional while improving the quality of care for your patients and making a larger contribution to your organization and field? Ballsbridge University's nursing degree can help pave the way to more career opportunities, higher earning potential, and a greater ability to make an impact on today's dynamic healthcare landscape.

Overview

As standards for the profession evolve, RNs are increasingly expected to enhance their educational preparation in today's healthcare environment. With Ballsbridge's BSN program, you can enhance your ability, gain specialized knowledge, and qualify for new nursing opportunities in a changing healthcare environment. Our relevant, evidence-based BSN program equips you with the tools needed for success in a nursing career so you can change your world and the world of those around you.

Learning Outcomes

Graduates of this program will be prepared to:

1. Apply leadership and informatics concepts in decision making to promote patient safety and quality care.
2. Use evidence based on the sciences, humanities, and research to guide nursing practice across the health-illness continuum in a variety of healthcare settings.
3. Evaluate the implications of policy on issues of access, equity, affordability, and social justice in healthcare delivery, including the health of vulnerable populations and healthcare disparities.
4. Demonstrate effective communication and collaboration skills to improve patient outcomes.
5. Implement individual and population-focused interventions to promote health and to prevent and manage disease and injuries.
6. Exhibit accountability for personal and professional behaviors in accordance with standards of moral, ethical, and legal conduct with a commitment to continuous professional development.
7. Provide patient-centered nursing care based on a comprehensive and focused health assessment across the lifespan using sound clinical judgment as well as developmentally and culturally appropriate approaches.
